

# How Kosuke's adversarial review works

1/6

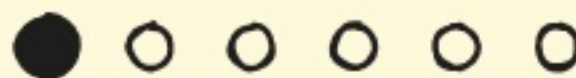

## 1. The proud hand-off

Behold: feature/everything!  
4,000 lines. Zero tests.  
Ship it?

Lovely. Let me invite two  
models who disagree with  
everything.

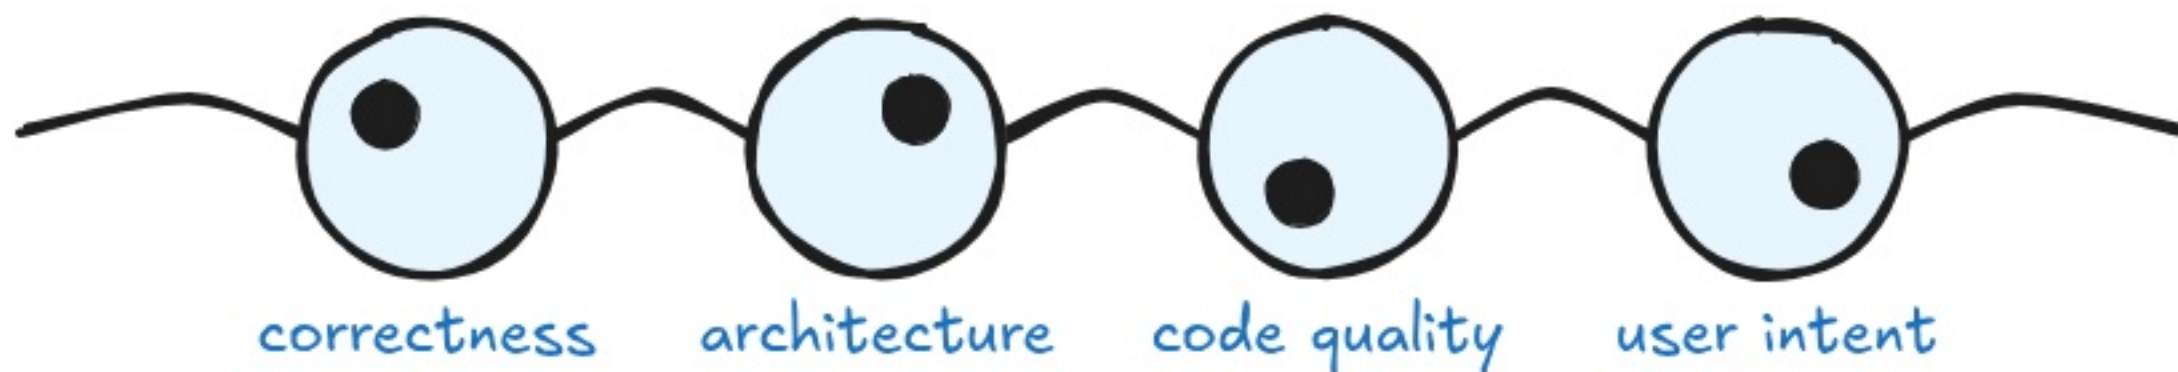

swipe

# How Kosuke's adversarial review works

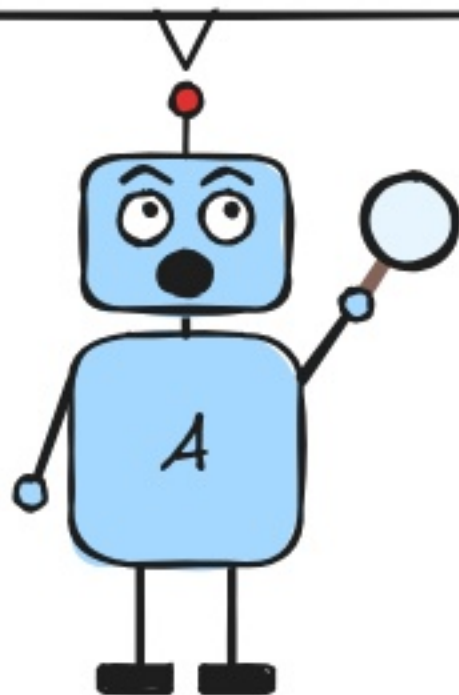

2/6

2. Both models read the whole branch, through four lenses

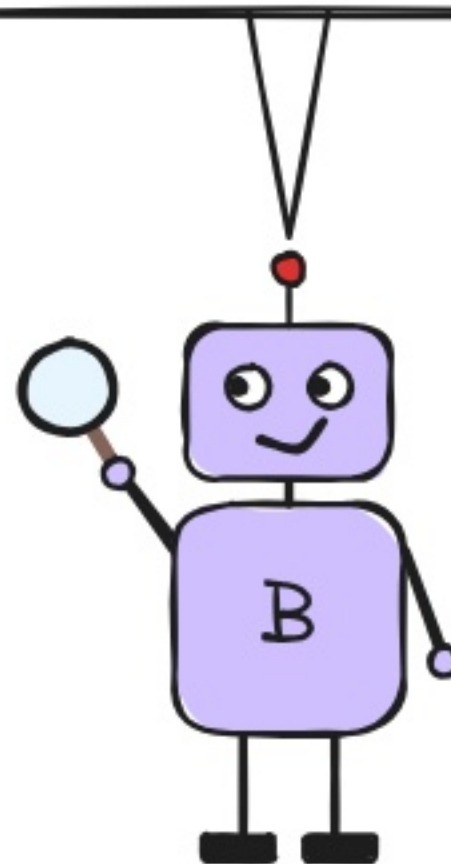

F1 · correctness:  
line 42 divides by zero!

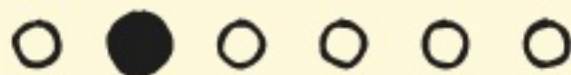

F4 · user intent: they asked for a  
dark-mode toggle, not a rewrite in  
Rust.

Nothing from me. I'm saving my  
energy for the cross-examination.

3. The other model challenges every finding

**OBJECTION!**

...I may have read it  
upside down.

F1: line 40 already returns  
early when n is 0!  
F4: maybe they **WANTED** Rust?

# How Kosuke's adversarial review works

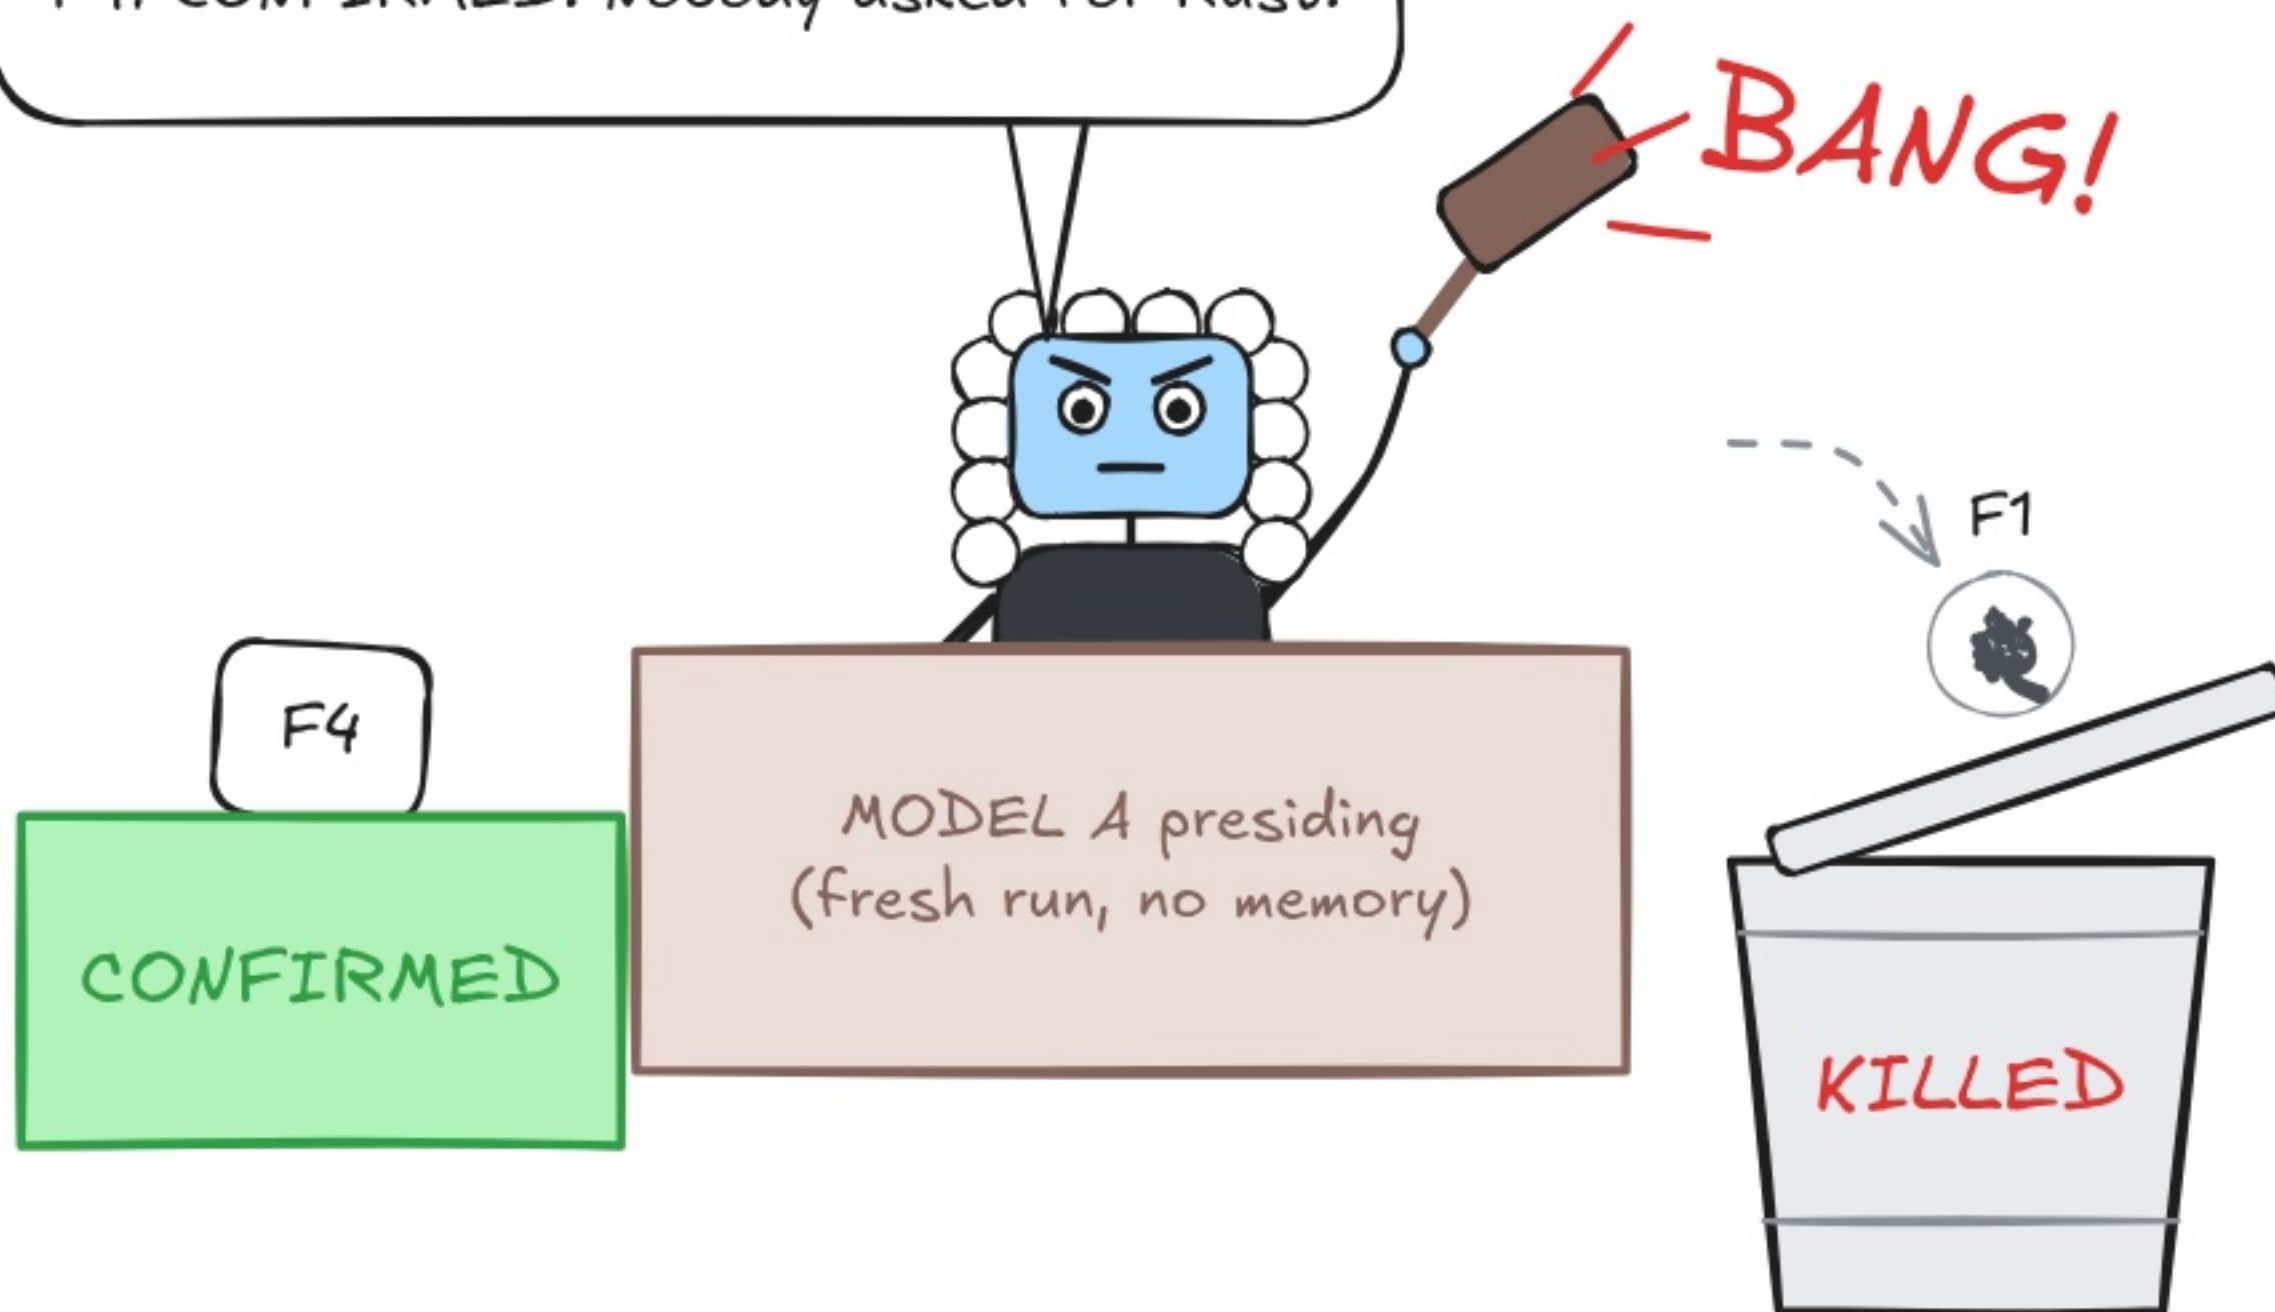

4/6

## 4. The judge decides what stands

F1: KILLED. Line 40 guards it.

Who wrote this?!

F4: CONFIRMED. Nobody asked for Rust.

5/6

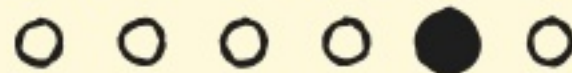

5. With --fix: repair, then verify

Fixed F4! Touched nothing else. Promise.

Nice job!

THUNK!

Told you it was perfect.

You're welcome.
